

Judge Pepper:

November 1, 2021

I wish to make the Court aware of a number of developments which are transpiring at the Federal Prison Camp at Yankton, SD ("Yankton").

On the morning of Tuesday October 26, 2021 I was placed in the "hole" (disciplinary housing unit) (special housing unit) and told I was under investigation. Shortly thereafter, I was brought to a room where I encountered a man and a woman who stated they were US Marshalls from South Dakota. I was not given business cards, I was not normalized. These individuals stated that they were there to get my side of the story but were not specific as to the nature of the visit, terming it a courtesy interview.

They did ask me if I was thinking about hurting myself or anyone else. I inquired who the anyone else referred to and they were again not specific in their statements other than to say individuals associated with my case and possibly Court staff.

They stated that this was not their case but individuals associated with the

Wisconsin Marshall's office.

I have since been told that I am in the "hole" based on a request by the Wisconsin Marshall's office and that my mail, among legal files necessary for defending the upcoming TRD are not held at BOP (Receiving and Discharge) suggesting my evidence was taken by those Marshalls.

This yet another of many ongoing violations of my rights. This institution continuously opens and copies my legal mail prior to giving it to me in general mail call.

As you may remember the Government requested they be allowed to view the evidence to be used in the upcoming TRD and requested access to the questions to be asked of witnesses prior to the TRD hearing. This Court denied that request. Since that time, as you are aware, the BOP (Bureau of Prisons) denied our request for an attorney visit suggesting all communication via Web EX. It is now so the Court is aware the Government has

Caught listening in on attorney/client calls
(over 500 cases) in the 8th Circuit. Attorney
Deege has stated the RobEx was inadequate
for preparation. When the BOP finally
approved our request for a face-to-face
attorney visit we were told that we would
not be allowed to exchange documents,
creating a need for hundreds of pages of
evidence to be mailed, and possibly
intercepted, read and perhaps lost. I have
had instances of certified/legal mail from
this institution to the Court of Appeals for
the 7th Circuit disappear.

I believe this to be more of the Government's
attempts at "damage control" and are
awfully unconstitutional.

I request I be moved closer to Milwaukee,
perhaps Oxford Prison Camp where attorneys
representants can visit me and go
over my evidence and be proposed.

Give a full and fair opportunity to
present my case, it will prove overwhelmingly
that a guilty suit brought against the

alleged 15-CR-115 Farmland and 16-cr-100
Oakley case victim has profit and
are hat for harassment.

I have never experienced this level
of dishonesty and corruption, it is
unfragile.

The Government is obviously petrified
of the evidentiary materials I have
that will expose their aetraths.

The farmland entities I was involved
with did not fail, They were not fraud
schemes, they were alleged with a
number of "upper" entities to create
insulation from the successor public
entity so they didn't have to pay me.
Period! No one knows this case or the
evidence like I do and I'm telling you
that is what happened. No investor
lost money but Ted Dyer and Father
Mel, all received securities in the
successor public company in exchange
for their securities in the farm land
companies that were the focus of the
15-CR-115 Farmland case, after September
2011.

Peggy

Certificate of Service

I hereby certify that on November 1, 2021 I emailed this letter dated November 1, 2021 to the Clerk of Court and request all relevant parties be served with cause via the Court's electronic mail system.
